

## Pro Rata Module Fee Calculation

When taking or resitting an individual module, the fee is worked out on a pro rata basis. This calculation is based on the full-time higher education (FTHE) fee you were charged when you first started your HE programme at New College Durham.

### Formula

Formula	Explanation
$\text{FTHE fee} \div 120 \times \text{Module credit value}$	The full-time fee is divided by 120 credits (a full academic year) and then multiplied by the number of credits for your module.

### Example

Scenario	Calculation	Fee Charged
A student who started in 2024/25 with an FTHE fee of £9,250 is resitting a 20-credit module	$£9,250 \div 120 \times 20$	£1,541.67
